

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-26. (Canceled)

27. (Previously Presented) A control unit section of a drive unit provided with an electric motor is mounted on the drive unit to be united therewith, the control unit section comprising:

a power unit; and

a control unit, the power unit being directly mounted to the drive unit, and the control unit being elastically supported on the drive unit using a vibration proof mechanism, the control unit comprising a control board mounted to a base to control the drive unit, and the base is supported through the vibration proof mechanism on the drive unit,

wherein the drive unit is a hybrid drive unit connected to and united with an internal combustion engine, and the vibration proof mechanism is made of a vibration proof material and has a resonance frequency, which is at least a primary frequency of a cylinder firing of the internal combustion engine and at most a resonance frequency of the control board.
